

ENVIRONMENTAL POLICY

Green Spark assists businesses in pollution prevention, management of pollution risk and reducing their carbon footprint. This includes advising and investigating on site conditions and procedures with in-house staff and specialist third party contractors who are selected for their expertise and experience in the field.

Green Spark recognises that its activities and operations have an impact on the environment and is committed to protecting the environment and conserving natural resources by operating in a manner sensitive to the environment and complying with all relevant legislation and other compliance obligations. In particular, Green Spark is committed to:

- Minimising waste products from all processes;
- Maximising energy and water efficiency;
- Reducing the impact of travel and transport;
- Continually improving the company's environmental performance and assisting our customers to improve their environmental performance.

Green Spark will access the most technically accurate advice that promotes current best environmental practice to help ensure that activities and services do not damage the environment and to provide up to date advice to customers to manage their pollution risk and environmental compliance obligations.

These commitments will be achieved by:

- Establishing and maintaining an Environmental Management System to the requirements of ISO14001:2015;
- Setting and reviewing progress towards environmental objectives;
- Providing environmental training for all employees to understand the company's Environmental Management System and their role within them;
- Working with suppliers, customers and contractors to encourage the adoption of environmentally responsible practices.

Signed on behalf of the Board of Management: Michael E Flanagan

Position: Managing Director
